

ROMIC Group is proud to be able to offer:

Quantity x Class 43 High Speed Diesel-Electric Locomotives

The British Rail InterCity 125 (HST - high speed train) needs little by way of introduction; ROMIC Group is proud to be able to offer the Class 43 HST locomotives to the world market.

Additional Specification

Engine: MTU 16V4000 R41R
 Traction motors: GEC G417AZ (43124-43152) or Brush Traction TMH68-46 (frame mounted, four per locomotive)
 Alternator: Brush Traction BA1001C
 Bogie type: BP10
 Wheel diameter: 1,016mm (3'4")
 Fuel capacity: 4,500L (990 imperial gallons)
 Maximum tractive effort: 80kN (17,980lbf)
 Continuous tractive effort: 46kN (10,340lbf)
 Train brakes: Air
 Train heating: Electric
 Safety systems: AWS / TPWS
 Multiple working: Within class

Brief Specification

Type	Diesel Electric
Wheel arrangement	Bo-Bo
Specification	UIC
Maximum Speed	200km/h (125mph)
Gauge	1,435mm (4' 8.5")
Length over Buffers	17,790mm (58' 4 3/8")
Width	2,740mm (9')
Height	3,900mm (12' 9.5")
Weight	70.25t (metric)
Axle Load	17.56t (metric)
Maximum Power	1,678kW (2,250hp)
Power at Rail	1,320kW (1,770hp)

Quantity x Class 43 High Speed Diesel-Electric Locomotives

Background to the Class 43 High Speed Train

Built by British Rail Engineering between 1975 to 1982, the Class 43 is still officially the fastest diesel locomotive in the world, with a recorded top speed of 148.5mph. Regular service speed was 125mph, with trainsets formed of Mk3 coaches with a Class 43 power car at each end.

From 2005 the class was extensively overhauled and life-extended with the original Paxman Valenta power units being replaced with MTU 4000 units.

The Class 43 offers a proven high-speed, long-distance passenger solution for non-electrified lines.

ROMIC Group is able to offer these locomotives worldwide, having already supplied a number of these locomotives in Mexico and Nigeria. We can provide an end-to-end service including shipping from the UK, training and handover, and provide a support package of spare parts including major spares such as engines, alternators and bogies.

Mk3 coaches also available in a variety of configurations; first class, standard class, restaurant / buffet and with guard's / train manager accommodation.

We welcome expressions of interest from interested parties.
